

Organizations and Individuals Recognized by Gov. Snyder for Energy Efficiency Efforts

Bartholomew Heating and Cooling/Energy Saving Servings Named Contractor of the Year at First Annual Governor's Energy Excellence Awards

LANSING, MICH.—Individuals and organizations from across the state were honored by Gov. Rick Snyder for their commitment to responsible energy production and consumption at the first annual Governor's Energy Excellence Awards event in Lansing. Michigan has emerged as a leader in energy efficiency and the awards are meant to showcase outstanding achievements in reducing energy waste.

"Reducing energy waste doesn't have to mean scaling back or doing less. Each of the nominees have demonstrated that it's possible to do as much or more by finding new and innovative ways to get things done," said Gov. Rick Snyder. "This is important because reliable and affordable energy fuels Michigan's economy, and continuing to reduce our energy waste is one of the main ways we are going to keep energy prices affordable in Michigan."

Bartholomew Heating and Cooling/Energy Saving Services was selected as Contractor of the Year for its work helping more than 1,240 customers submit applications for energy-efficiency programs sponsored by Consumers Energy. Bartholomew Heating and Cooling/Energy Saving Services is a heating, ventilation, and air-conditioning that spans three generations. Since 2011, projects the company has worked on have reduced residential natural gas by more than 121,000 MCF and residential electricity usage by more than 10,000 MWh. On average, Bartholomew's customers receive 35 percent higher energy savings than the typical Consumers Energy Home Performance program participant.

Nominations were made in one of eight categories celebrating differing ways in which energy efficiency can be achieved in the state of Michigan. The winners and finalists in each category are listed below.
